

DISTANČNÍ VÝUKA

31. 1. - 4. 2. 2022

Vážení rodiče,

protože předškoláci mají v posledním roce výuku povinnou, posíláme Vám pro děti nějaké pracovní listy a další náměty k distanční výuce.

Pracovní listy najdete v přiloženém souboru.

Prosíme, aby je děti po návratu do školky přinesly vyplněné.

Děkujeme :-)

- pozorujte s dětmi ptáky a jejich stopy v přírodě
- vyrobte si s dětmi ptáčka podle přiloženého vzoru
- každý den vypracujte alespoň jeden pracovní list
- dbejte na správné sezení a držení tužky při práci
- zazpívejte si s dětmi písničku o zimě, nebo o ptáčcích, děti určitě nějakou znají (V zahradě na hrušce, Sněží sněží, Kdo to ťuká na okénko, Vzal vrabeček na taneček sýkorku ...)
- zacvičte si s dětmi podle návodu

ŘÍKANKY S POHYBEM

Vrabčáková:

Skáče vrabčák vesele,
(ruce na ramena a poskoky)
 rád se vždycky popere.
(boxujeme do vzduchu)
 Hnízdo staví u lidí,
(jako stavíme ruce přes sebe)
 kdo ho za něj uklidí?
(tážeme se rukama)

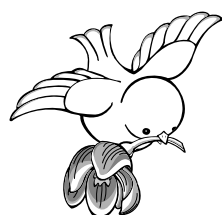

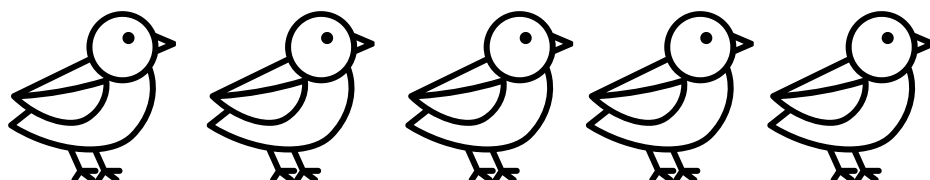

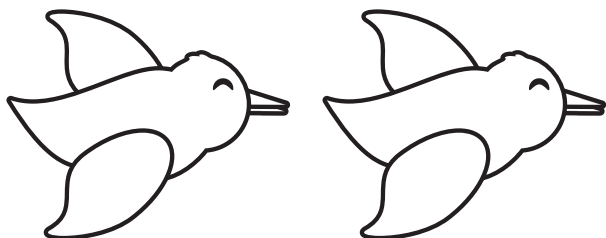

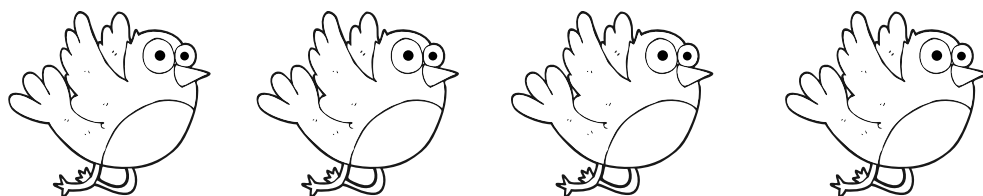

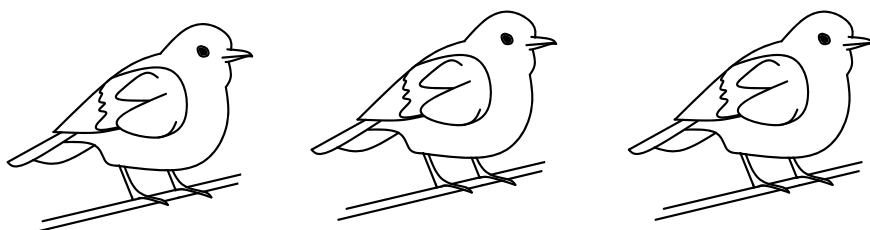

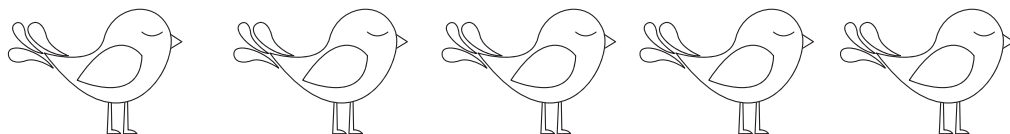

ŘÍKANKY S POHYBEM

Sovičková:

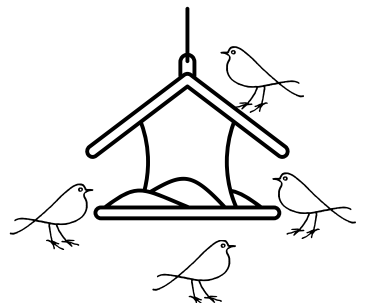

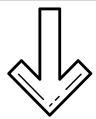

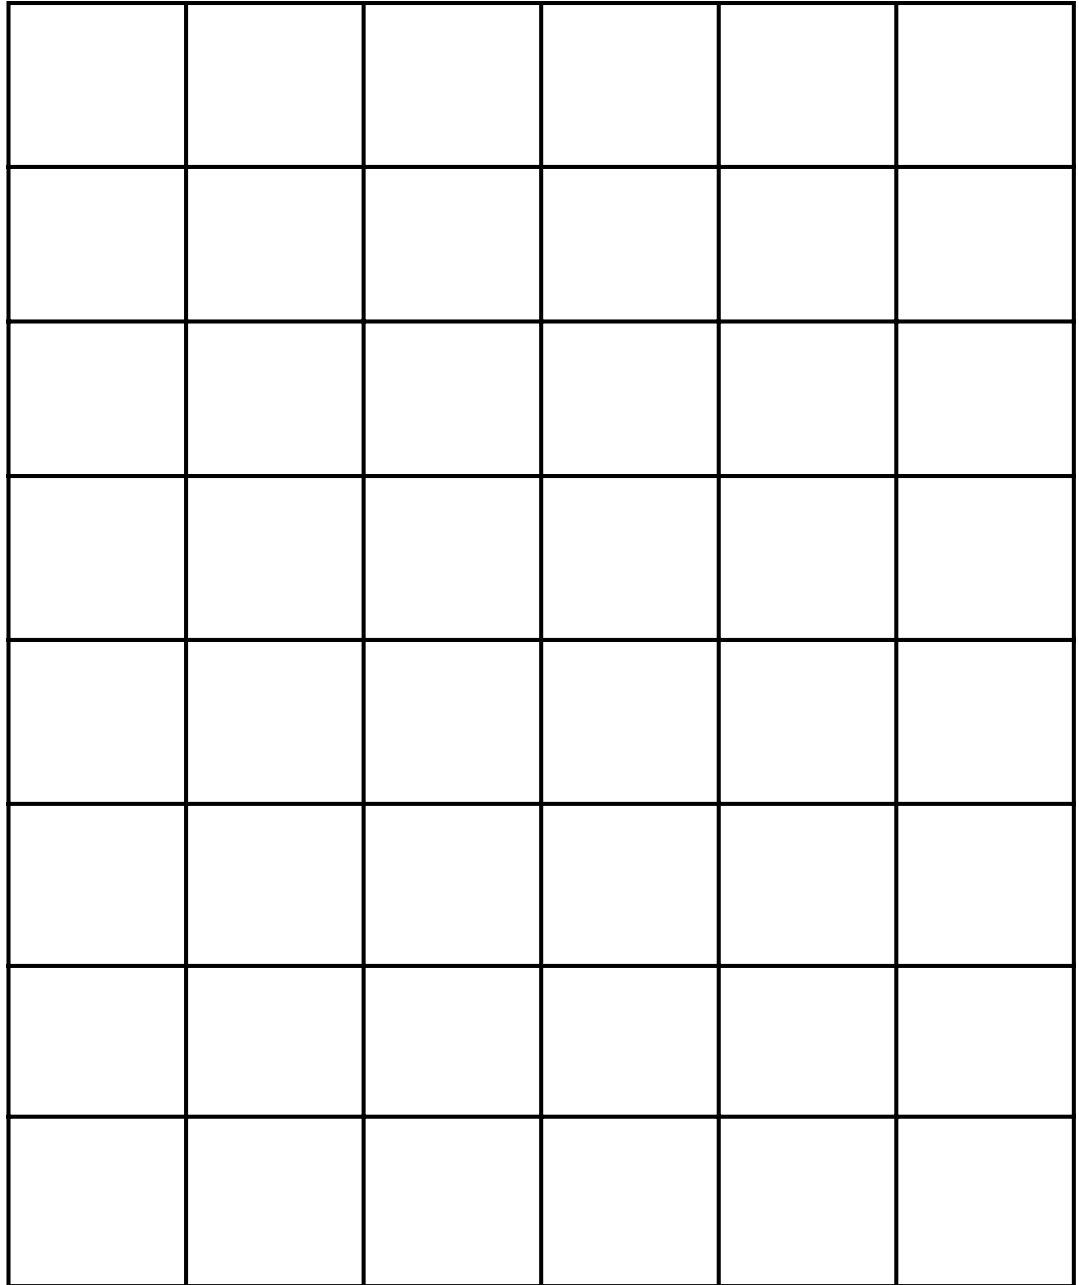

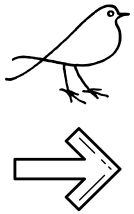

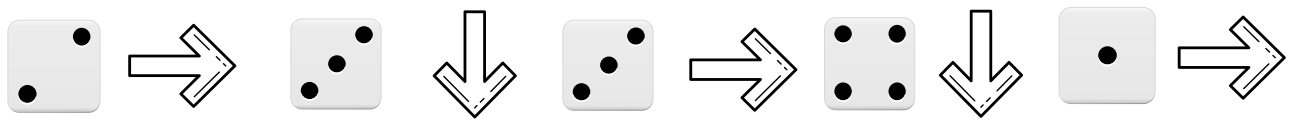

Hůůhůhů
(houkáme)
 Sova houká po lese,
(poskakujeme)
 sejdeme se na plese.
(uděláme holubičku cokoli)
 Peříčka si načechráme,
(šťípeme se, naparujeme).
 a pozveme všechny známé
(lákáme ukazováčkem kamarády)
 Hlavně datla, kukačku,
(ruce na ramena a kroužíme)
 lístky půjdou na dračku.
(vydupeme)

Spočítej ptáčky a zapiš pomocí čísel, nebo teček.

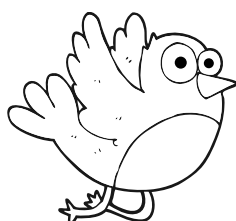

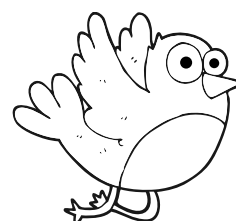

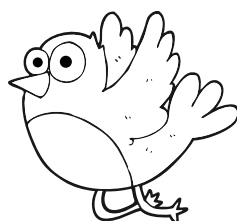

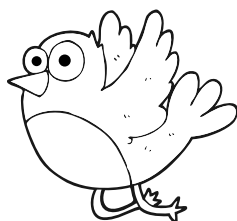

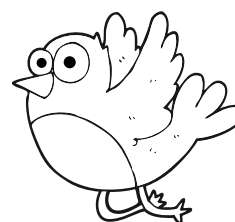

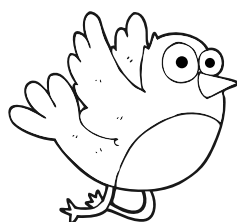

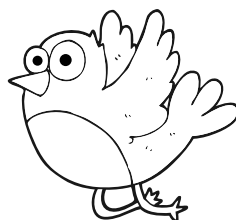

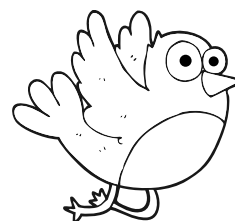

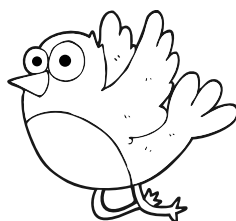

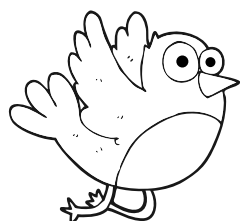

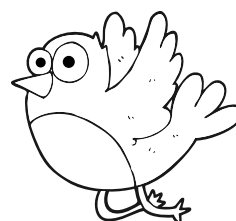

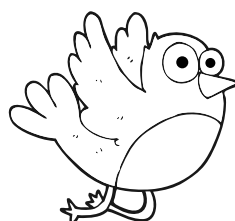

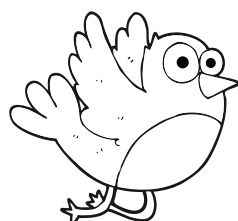

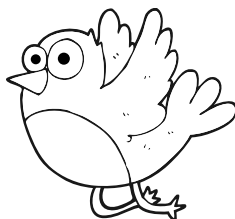

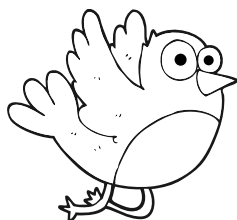

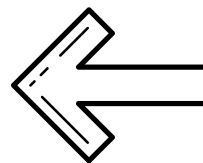

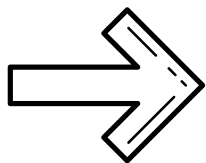

Najde ptáček cestu ke krmítku?

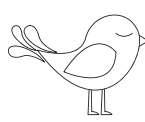

Na kterou stranu letí ptáček?

Vybarvi ptáčky vlevo červenou barvou a ptáčky vpravo modrou barvou.

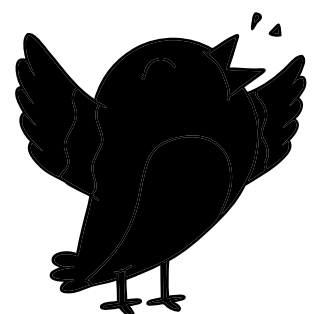

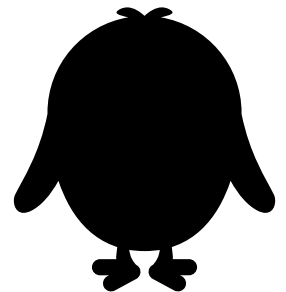

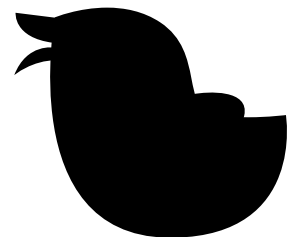

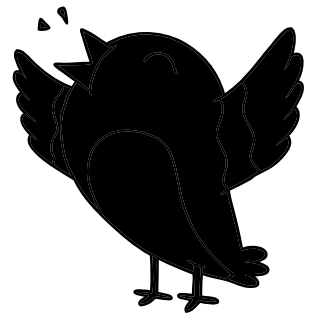

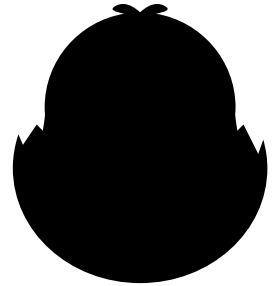

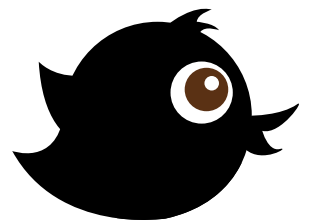

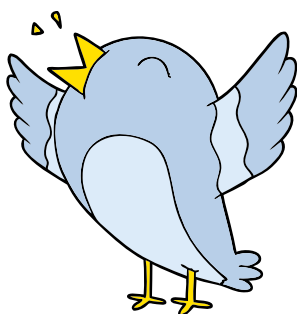

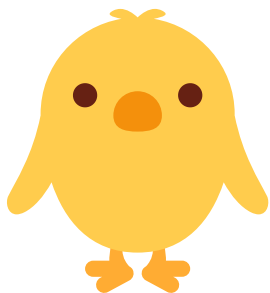

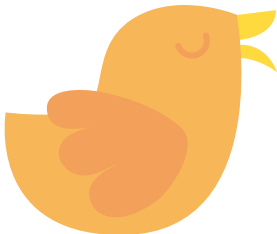

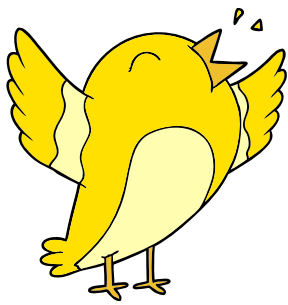

Kolik je ptáčků u krmítka? Spočítej a zapiš.
Vybarvi stejné ptáčky stejnou barvou.

							
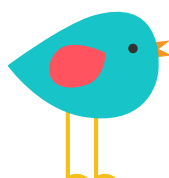

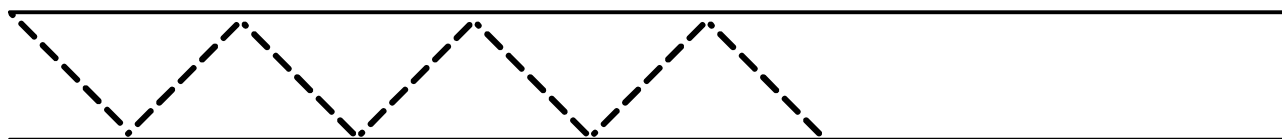

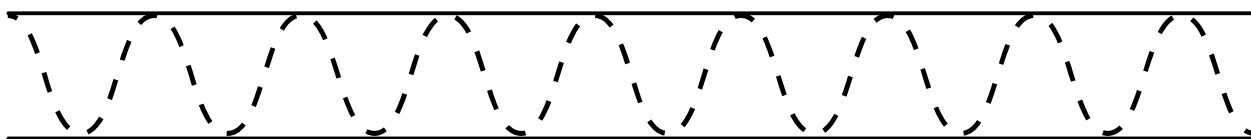

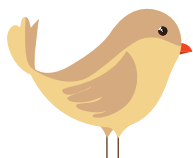

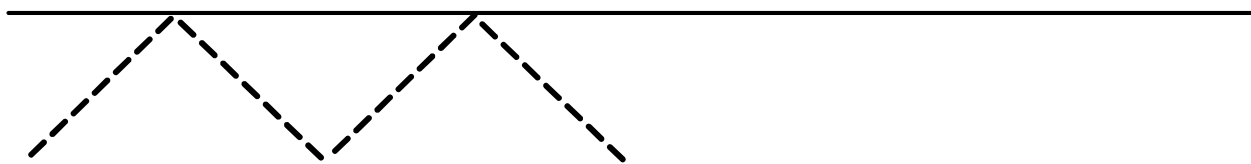

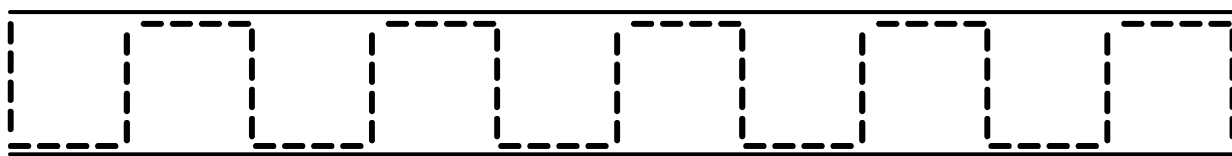

--	----------------------	---	----------------------	---	----------------------	---	----------------------

Spoj ptáčky s jejich stínem

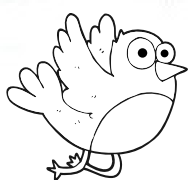

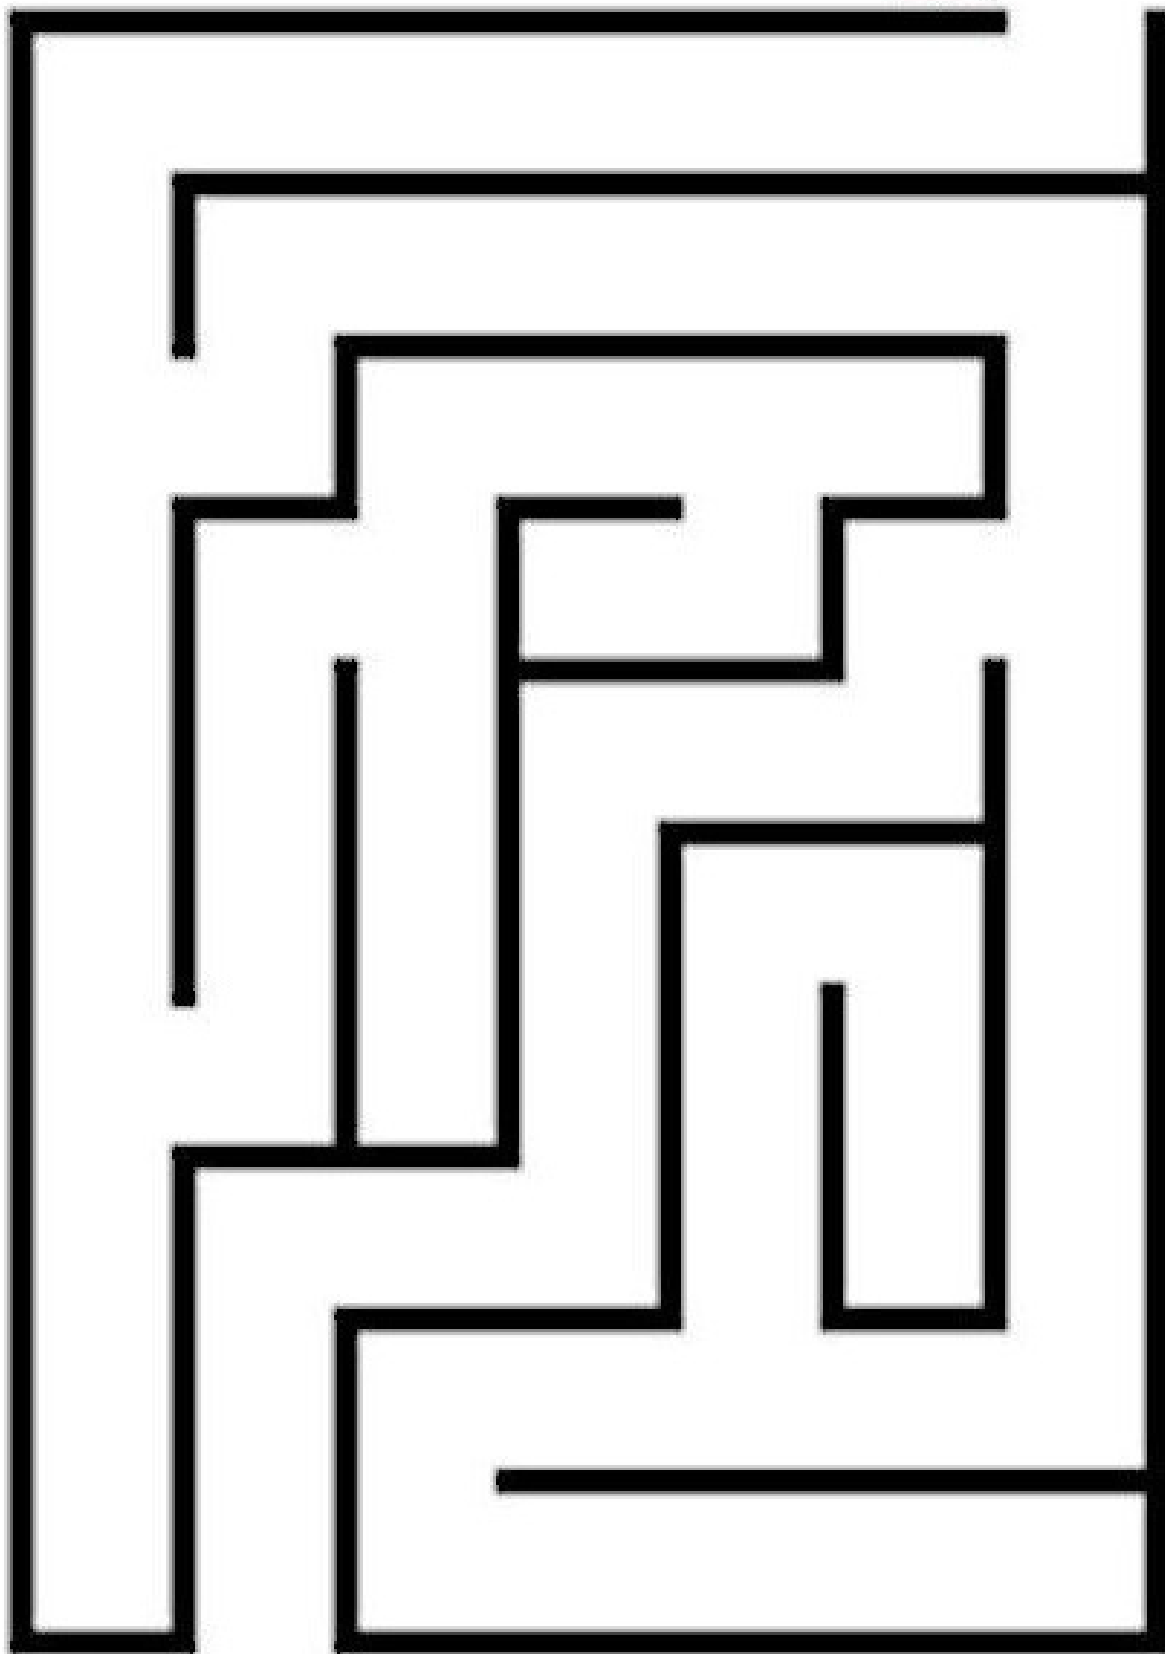

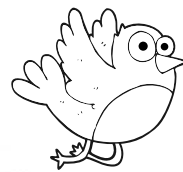

Obtáhni a doplň podle vzoru.

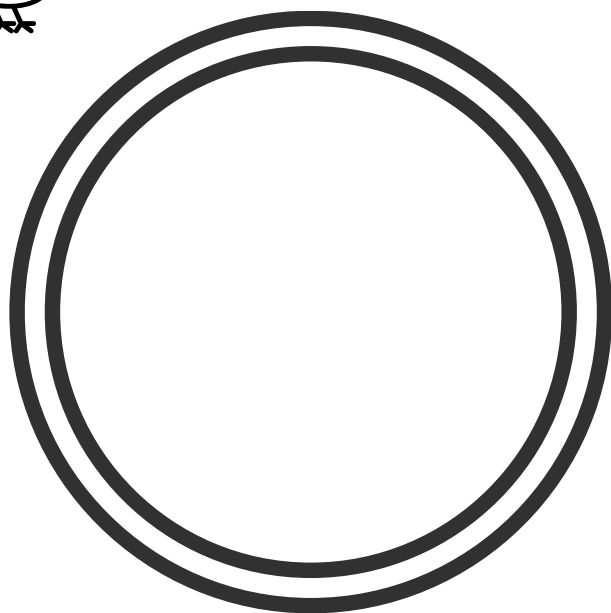

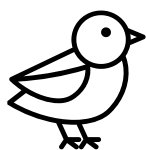

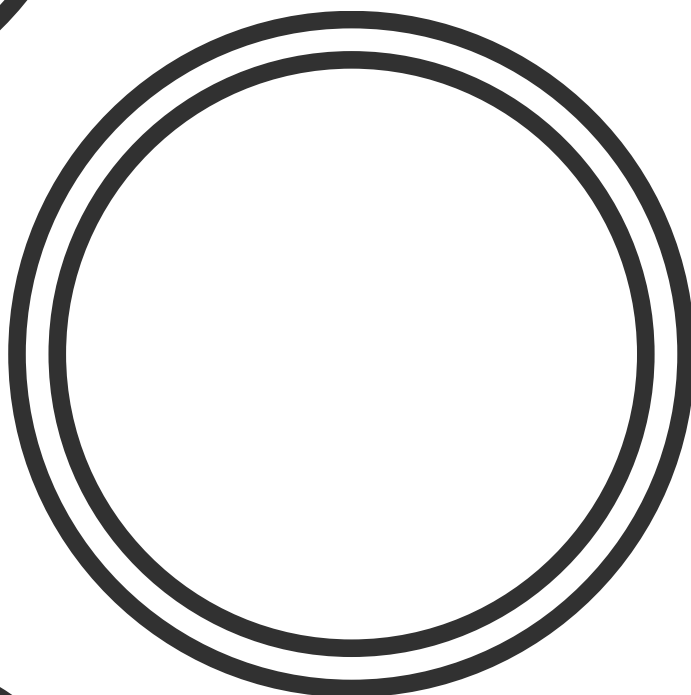

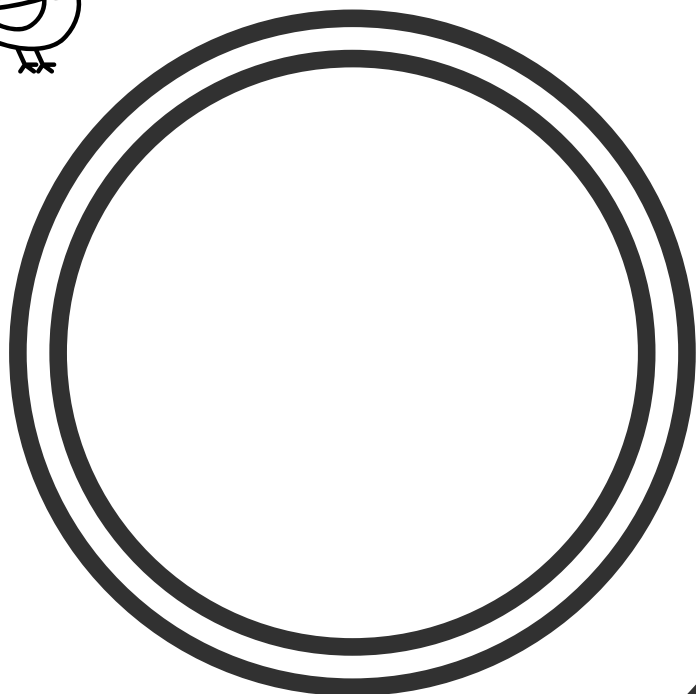

Dbej na správné držení tužky :-)

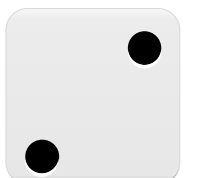

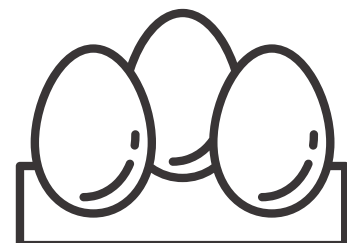

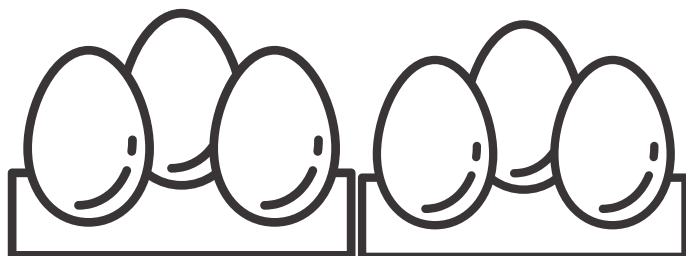

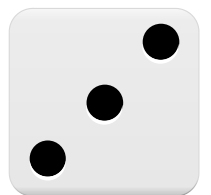

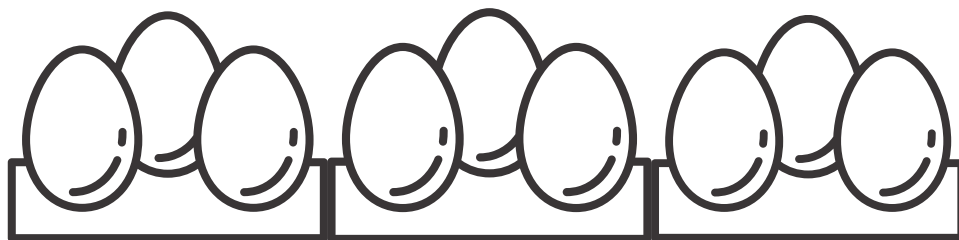

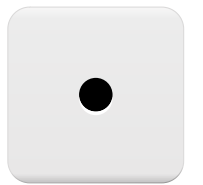

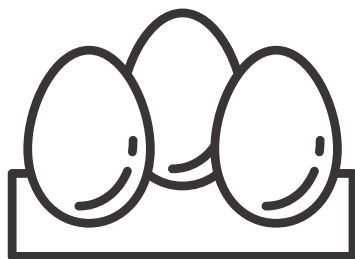

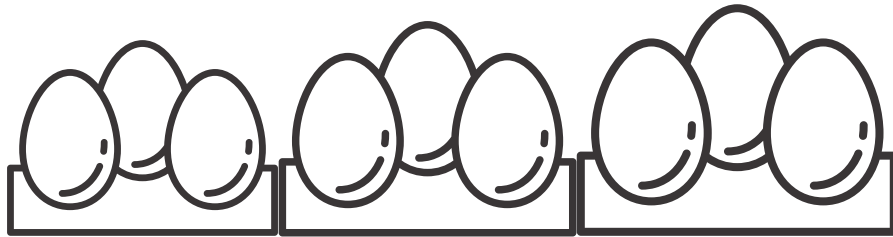

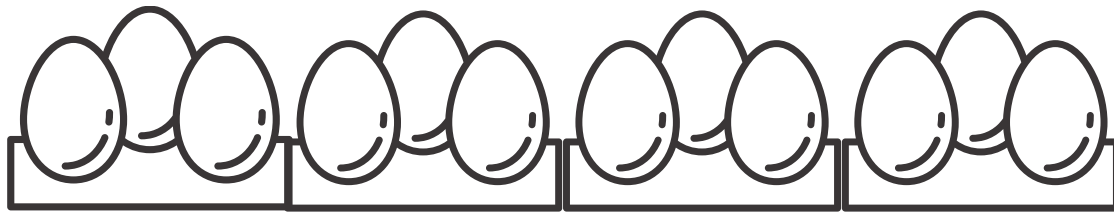

Najdou ptáčky k sobě cestu?

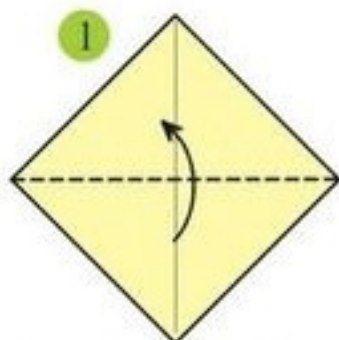

Nasyp ptáčkům do krmítka zrníčka

Vybarvi vajíčka podle teček na kostce

Poskládej ptáčka podle vzoru na obrázku
